

PERMATIMBER®

LOW MAINTENANCE. ECO FRIENDLY. DECKING SOLUTIONS

ADJUSTABLE PEDESTALS

PermaTimber® Adjustable Pedestals are the ideal solution when constructing your decking subframe. The pedestals act as supports, like pillars, underneath the decking subframe and allow you to easily account for slopes and slants during your installation.

PERMATIMBER®

ADJUSTABLE PEDESTALS

Features

- Available in a variety of sizes to fit the job.
- Create an even and stable decking sub-frame.
- High bearing capacity.
- Convenient installation.
- Decking keel and Joist Fixing Head.
- Stone Divider: 3mm, 5mm, 8mm.
- Made from durable Glass Fibre Reinforced Polypropylene Plastic resin.
- High and low temperature resistant.
- Easy to maintain.
- Water and UV Resistant.
- 100% Recyclable.

Components

Installation is Easy!

- Adjust the pedestal height for application, then place them at the site according to span.
- Cover the pedestal basement with concrete in order for it to be stable.
- Place the beams on top of the pedestal
- Fix the beams with screws to the pedestal

Diagrams

Specifications (MPP-0-0)

Order Code	MPP-0-0
Adjustment Range	70 - 110mm
Stand Foot Diameter	205mm
Support Plate Diameter	150mm
Maximum Resilient (Single Unit)	7,500kg
Minimum Resilient (Single Unit)	2,000kg
Weight	0.427kg

Specifications (MPP-1)

Order Code	MPP-1
Adjustment Range	50 - 70mm
Stand Foot Diameter	205mm
Support Plate Diameter	150mm
Maximum Resilient (Single Unit)	7,500kg
Minimum Resilient (Single Unit)	2,000kg
Weight	0.342kg

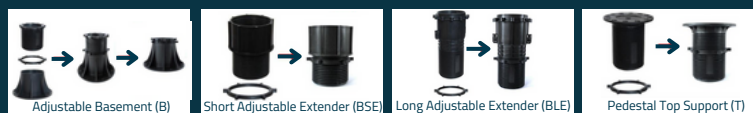

Specifications (MPP-2)

Order Code	MPP-2
Adjustment Range	70 - 110mm
Stand Foot Diameter	205mm
Support Plate Diameter	150mm
Maximum Resilient (Single Unit)	7,500kg
Minimum Resilient (Single Unit)	2,000kg
Weight	0.427kg

Specifications (MPP-3)

Order Code	MPP-3
Adjustment Range	110 - 190mm
Stand Foot Diameter	205mm
Support Plate Diameter	150mm
Maximum Resilient (Single Unit)	6,500kg
Minimum Resilient (Single Unit)	2,000kg
Weight	0.605kg
