

PERMASTRUCT®

Alternative, Clever

HDPE PANEL

PermaStruct® HDPE (High-density polyethylene) panel is an ultimate high strength heavy duty material that can be used for a large range of commercial applications. HDPE panel is UV Resistant, waterproof and is an alternative to 19mm Marine Ply.

For illustration purposes only

WATERPROOF. UV STABILISED. HEAVY DUTY LINING. LIGHTWEIGHT

Please ensure you download and read a copy of the **PermaStruct® HDP Panel** fabrication guide prior to, and during your fabrication. Failure to do so will void your warranty.

You can download the fabrication guide by scanning the QR Code or visiting www.permacomposites.com/brochure-installation-guide-library/

HDPE PANEL

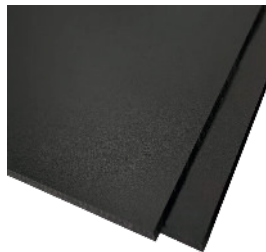

Features

- **Heavy Duty:** It can be used in countless applications such as horse stable lining, construction surfaces, trench covers, platforms and much more.
- **Weatherproof:** HDPE Sheeting can take quite a beating! Wind and rain is nothing compared to the strength it can hold.
- **UV Stabilised:** Made for the harsh Australian sun. We've included UV inhibitors so colour holds.
- **Long Life Span:** Install and forget! HDPE sheeting is meant to be used as a heavy-duty material, meaning it will last long.
- **Non Conductive:** HDPE Sheeting is non-conductive, making it perfect for any use!

Colours

A range of custom colours are available on request.

The default colour that the panel is manufactured in is a smooth, sleek black.

Order Codes

Description	Thickness	Colour	Code
HDPE Panel	15mm	Black	HDPE PANELS-BLK

Specifications

Thickness	15 mm <small>(Custom thicknesses are available on request)</small>
Panel Size	1200 x 2400 mm <small>(Custom sizes are available on request)</small>
Coverage Area	2.88 m ²
Weight	14.40 kg/m ² 25 kg/panel
Colours	Black <small>(Custom Colours are available on request)</small>
Recommended Span	450 mm
