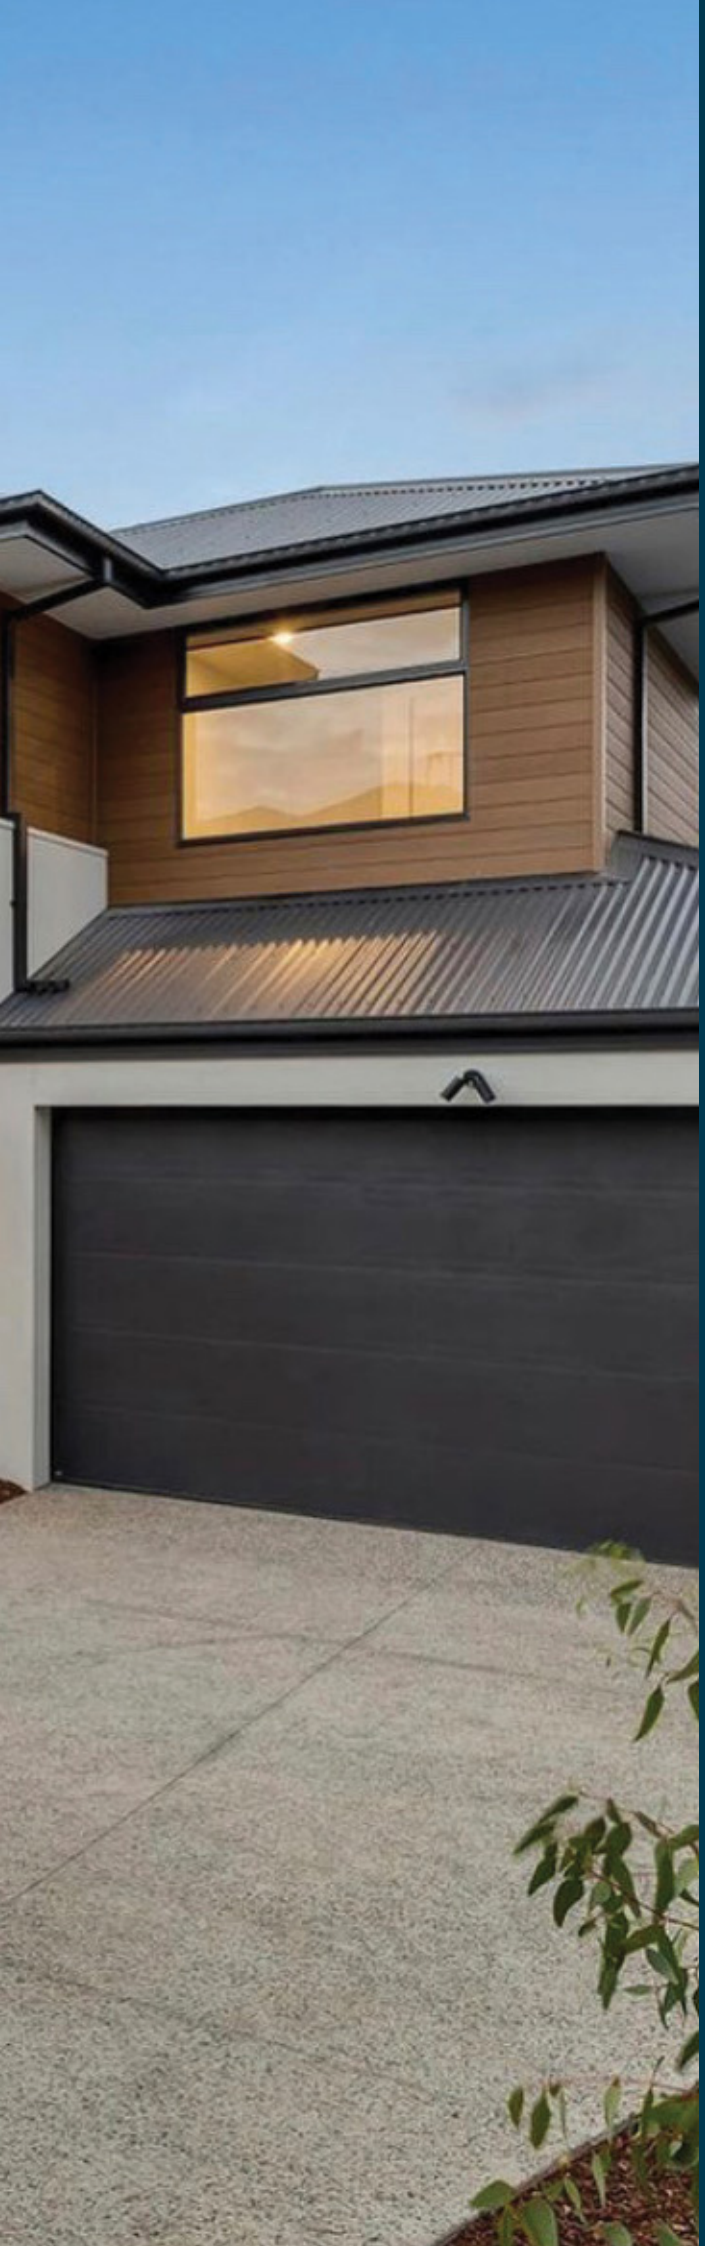
PERMATIMBER®

Alternative, Clever

EXTERIOR CLADDING | Traditional | Castellated | WeatherLap | Battens



A company born from imagination.

PermaTimber® was born from a need for an alternative, clever timber product that is long lasting, easy to install and requires no prep work and little ongoing maintenance.
We succeeded in creating the PermaTimber® range, a composite cladding that won't fade, warp or need maintenance work.

CX Castellated Cladding

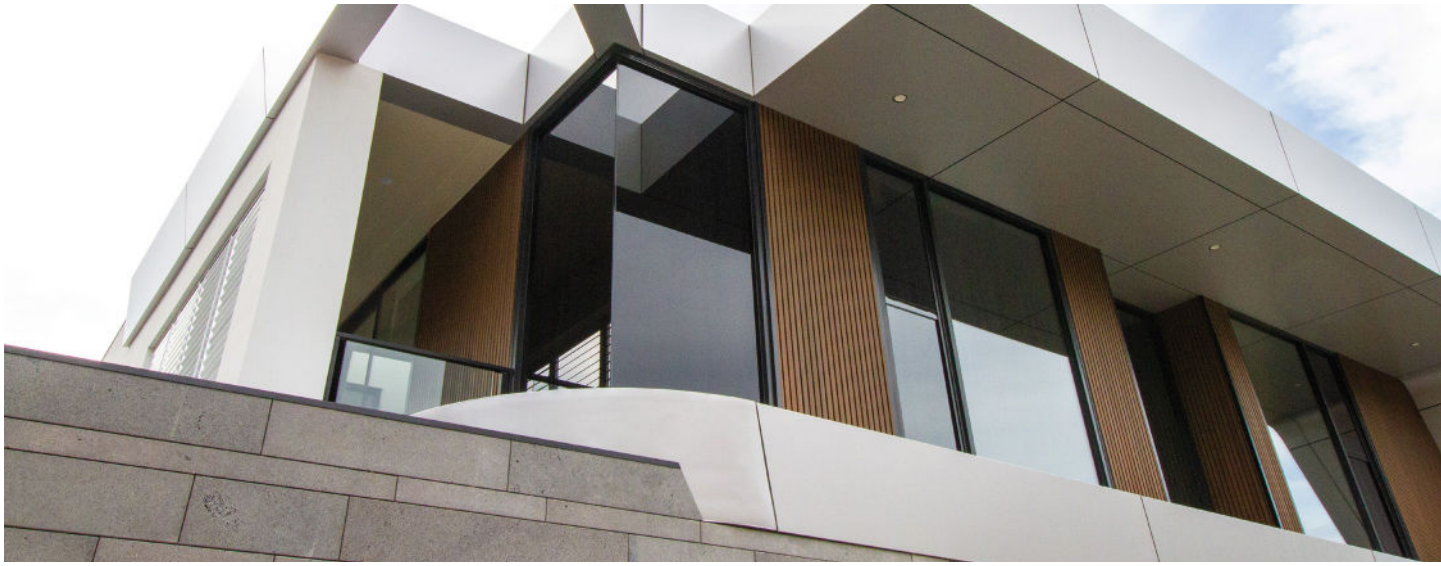
PermaTimber® CX Castellated Cladding displays a ribbed profile and offers the option of a multi trim system (powder-coated aluminum and WPC).

CX Castellated Cladding is pre-finished, providing the classic attractive facade of natural timber without traditional maintenance.

Panels can be installed vertically or horizontally to create the desired appearance. Available in arandom width and standard profile options.



Traditional Cladding

CX Traditional Cladding is pre-finished with a co-extruded finish, providing the classic attractive facade of natural timber without traditional maintenance. Panels can be installed vertically or horizontally to create the desired appearance and are available in an original and WeatherLap profiles.

As a high-performance, co-extruded composite, Traditional Cladding offers the convenience of minimal maintenance and resistance to weathering. Traditional Cladding is also available in non-cumbustible option.

Batten Range

PermaTimber®'s batten range is available in a 40x40mm solid CX profile.

This product has a wide range of applications that compliment both residential and commercial applications.
